

Executive Summary - Sensible

Sunday 3rd October – Sunday 10th October.

This week, we've finalised all our minor fixes, and we are waiting for one last round of client feedback before publishing the app.

Rundown of the changes completed:

- Export specific files implemented
- Promotional video complete
- Delete button implemented
- UI reflects recording indicators
- Default sample rates (with max/min) added
- Metadata included for export files
- Handover documentation started
- Labels now reflect colour of graph when active
- Title of recordings now editable
- Rotation disabled
- Added notes for users about graphed and non-graphed sensors
- Placeholder text in main screen if no recordings are found
- Help button implemented to link to a tutorial video if users need help
- Fixed bug with selecting 0 recordings
- Completed and summarised user testing
- Enacted on user testing feedback (some of the UI changes above)
- Some minor UI fixes
- Produced APK and IPA ready for upload to app store
- Added user feedback if sensor doesn't exist/is disabled instead of crashing

To be completed next week:

- Publish iOS app
- Publish Android app
- Get and implement client feedback
