

## **Sensible Application for Android and iOS**

This document contains instructions on how to download the Sensible application to both your Android phone or iPhone. Both instructions refer to the following video which I recommend you watch before using the app:

<https://drive.google.com/file/d/1Hy0iT5kI43fdpzRf0QI-4hDEZXxPCmRG/view?usp=sharing>

### **Android Instructions:**

To download the APK file:

<https://drive.google.com/file/d/1nzTPQ6kUIWyeJjP3gJnKnwP6fmUtfvpm/view?usp=sharing>

Visit the link in your android browser. You should be able to download the file on your phone. Once it's completed, go to your browser's downloads section, or tap the notification that shows up once the download finishes. You will be asked whether you want to trust an apk file from unknown sources. Select 'yes' when prompted, and the app will be installed. It will show up in your app drawer as "TestProject". You can ignore any warnings from google play that ask you to scan the app or tell you that it may be dangerous.

To use the application, we recommend you watch the tutorial video which will be accessible within the application in the near future, but can be accessed at the above link right now. This video runs you through how to use the application and shows you the available features.

### **iOS Instructions:**

To test the iOS application on your iPhone, you will need to request a code from the development team and then follow the instructions below using the code you have been provided with.

Install the TestFlight app to your phone from the app store and open the application. The app will show a redeem button in the top right corner. Press redeem and enter the code provided to you by the development team. You will then be able to install the Sensible app to your iPhone. Once the app is installed, before leaving the TestFlight app, press on the Sensible logo which will open details about the application. Scroll down to the bottom of this screen and press the red 'Stop Testing' text. This won't remove the app from your phone, it will just allow us to use the developer account for other beta testers. You can find the Sensible app on your home screen and begin using it!

Before using the application, we recommend you watch the tutorial video which will be accessible within the application in the near future, but can be accessed at the above link right now. This video runs you through how to use the application and shows you the available features.
