

# Executive Summary - Sensible

Sunday 19th September – Sunday 26th September.

This week we received our approved application, corrected problems among the GPS sensors, finalised our testing report and have finally got our prototype new graph working.

## Rundown of the changes completed:

- Application for ethical testing approved!
- GPS sensor fixed all issues
- Added indicators for camera and microphone
- Added delete button for recordings (which doesn't yet delete the files)
- APK and IPA generated
- Sensor testing finalised
- Prototype graph complete

## To be completed next week:

- Export specific files implemented
- Work on promotional video
- Fix camera issues on iOS
- Implement delete button
- Migrate the project into a form that allows for the prototype graph to be implemented
- UI change to recording indicators
- Find guide sample rates
- Export metadata for recording files
- Start writing handover documentation
- UI changes to labels

## Burndown Chart
