

Executive Summary - Sensible

Monday 3rd May - Sunday 9th May

In this period, we finished our project promotional video, have added additional sensor functionality to the application, investigated performance and accuracy testing and have made a presentation for our final audit.

Rundown of the changes completed:

- Investigated performance/ accuracy testing
- Completed project promotional video
- Made a Prezi presentation for our final audit
- Made changes to graph labels to improve the app's usability
- Sorted our permission issues from the accelerometer
- Added Gyroscope sensor functionality
- Added Magnetometer sensor functionality
- Added Barometer sensor functionality

To be completed next week:

- Add export capabilities to the application
- Refine data labelling
- Prepare product for client handover
- Discuss stretch goals for next semester
- Begin working on adding camera sensor functionality
- Perform testing on the code which has been written
