

Executive Summary - Sensible

Wednesday 24th March - Tuesday 20th April

This period, we have started and completed a demo of our final product, started measuring and capturing sensor data and also started showing that data on graphical interfaces. In addition to these main changes, we also have a lot of documentation changes listed below.

Rundown of the changes completed:

- Sensor data read for microphone and accelerometer
- User permission captured for sensor data
- Graphical interface for data complete
- Linking between UI pages complete
- UI for application complete
- Audit 2 Reflection complete
- Security information upgrade
- Mini demo for client complete
- DCD, DFD, DM, Burndown Chart, Wireframes all complete

To be completed next week:

- Linking the data captured to the display graphs
- Iron out some issues with project running in some environments
- Update feedback based on tutor/client/shadow response
- Storing data locally
- Adding labels to data
