Executive Summary - Sensible

This period, we have started working on our project video, capturing and displaying input data from sensors, are putting the finishing touches on our product demo and worked on the final few features for this semester.

Rundown of the changes completed:

- Linked data captured to the display graphs
- In the process of ironing out all issues
- Data is stored locally
- Video storyboard complete and video creation in progress
- Changed the readme to explain team roles better
- Did exploration of reconstruction of audio data (creating an mp3 from raw data)
- Graph buttons added
- Lag issues ironed out

To be completed next week:

- Graph button functionality implementation
- Data labelling working
- Video finished
- Completing final touches on project
- Working out stretch goals (in case we end up with more time)
- Audit preparation
