Executive Summary - Sensible

Sunday 29th August – Sunday 5th August.

This week, we completed the splash screen for iOS and Android, made some initial logo designs, implemented a new sensor, worked on our audit reflection, fixed some bugs and worked on our practices in code.

Rundown of the changes completed:

- Splash screen for iOS and Android
- Audit reflection
- Best practices code audit
- Logo mock-ups
- Fix recording logic bug
- Work on mic output file
- Fix disappearing recording issue
- Worked on custom packages
- Implemented Magnetometer

To be completed next week:

- Add logo in to application
- Refactor async issues
- Do research on text-to-shader technology for graphing
- Work on iOS native versions of custom modules
- Sign up for developer accounts to get app published
- Get GPS data sensor
- Export all files individually option
